IN GLOBAL HEALTH

January

newsflash.

We have officially left 2021 behind us. If you're on the northern hemisphere, you may be longing for summer already. We know we are! This newsflash is to get you in the summer mood (you can never be too early, right?) and bring you a sneak preview of the 2022 global health summer schools.

The applications for the four Global Health summer courses hosted by the Utrecht University Summer Schools, Julius Global Health and partners have opened. You can now register for Fundamentals of Global Health; Global Health Ethics & Equity; Maternal, Newborn and Child Health, and Global Surgery & OBGYN.

Clicking the course names or banners will direct you to the Utrecht Summer school webpage. Here you'll be able to find more info on the courses (i.e., study load, course aims, course fees), as well as on the application procedure and application deadline.

FUNDAMENTALS OF GLOBAL HEALTH

27 JUNE - 1 JULY 2022

UNIVERSITY MEDICAL CENTRE UTRECHT

MSC EPIDEMIOLOGY

summerschool UTRECHT

UMC Utrecht

The first course in line is on [*Fundamentals of Global Health*](#). In this 1-week, full time course, you'll be introduced to the main principles of global health, which are essential in understanding health and disease in a global context. Topics discussed in this interdisciplinary course range from global health governance and policy, to the role of health systems, ethics and advocacy for research and development, to the effects of the COVID-19 pandemic, globalisation and climate change on health outcomes.

For whom? Master's level students, PhD researchers and professionals in medicine/global health/public health/biomedical sciences/social sciences or related disciplines with knowledge in epidemiology and public health and interest in global health.

GLOBAL MATERNAL, NEWBORN AND CHILD HEALTH

4 - 8 JULY 2022

UNIVERSITY MEDICAL CENTRE UTRECHT

summerschool UTRECHT

Wilhelmina Kinderziekenhuis Child Health

Amsterdam UMC Universitair Medische Centra

Amsterdam Centre for Global Child Health

UMC Utrecht

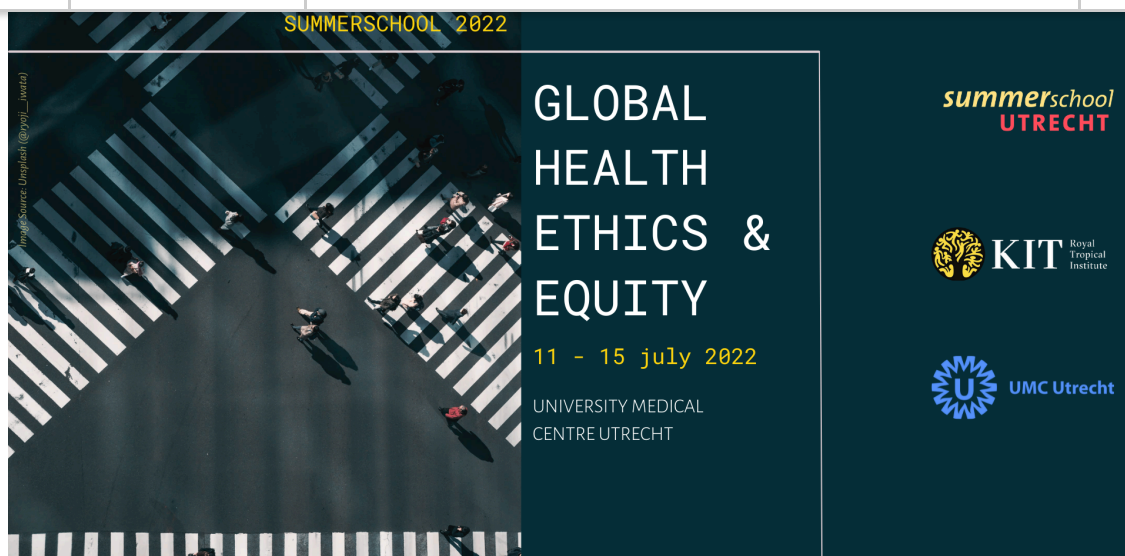

Next up is the course on [*Global Maternal, Newborn and Child Health*](#). This course will discuss key challenges in global maternal, newborn and child health and will provide a comprehensive overview of strategies to improve maternal and child health outcomes.

For whom? This course is open to all with an interest in global maternal, newborn and child health, including: master's level students (medicine / global health / public health / biomedical sciences), medical doctors, nurses, midwives, (PhD) researchers, and policy makers.

The [Global Surgery & Obstetrics/Gynaecology](#) summer course provides a unique overview of topics related to Global Surgery, Gynaecology and Maternal care, with an emphasis on essential surgical care from a worldwide perspective. A wide variety of topics will be discussed during interactive lectures, case study sessions and small working groups.

For whom? The organizers welcome a diverse group of participants, and encourage all health professionals (surgical and OB/GYN residents, clinical officers, residents in International Health and Tropical Medicine (AIGT), midwives, surgeons), health researchers, policy makers with an interest in surgery and women's health to apply. *Master's level students (medicine / global health / public health / biomedical sciences / midwifery) are welcome to join the course, but are expected to have working experience in a low-resource setting).*

The course on [Global Health Ethics & Equity](#) has been added to the global health summer school curriculum this year, and will focus on urgent topics and key challenges in global health ethics and equity. Experts will address the major challenges in health ethics and equity, as well as potential strategies to tackle them.

For whom? The course is open for all with an interest in global health and health equity: master's level students (medicine / global health / public health / biomedical sciences / philosophy / bioethics / applied ethics / sociology), medical doctors, bioethicists, (political) philosophers, sociologists, (PhD) researchers, policy makers.
